

Savannah Convention Center

Revised Venue Parking and Entrances Information

We are asking that attendees allow extra time (approximately 30 minutes) to get in the building from the overflow parking lot. At the bottom of the page is a bird's eye view of the building with the layout of parking. All event info can be found at <https://aagymnastics.org/national-championship>

Thank you for your patience as we have had to modify our parking plan due to construction that is taking place in the convention center parking area. Due to the number of parking spaces now available at the convention center, we will institute an overflow parking area plan.

The designated area shown on site map below will be open parking spaces. There will be parking attendants overseeing parking. After the main lot fills, cars will be directed to the overflow lot. Shuttles will be available, running constantly from the overflow lot to the front of the building for drop off, and bringing people back from the building to the overflow lot as needed. As the main lot opens back up, as people flow out after a session, parking attendants will let cars in to park, and the cycle will repeat.

Remember the Ferry Boat is also an option. Information posted on the site above.

Drop off will be in Bryan Square for anyone who might need to quickly drop off the group and then park the car.

- If the long walk will be an issue for some of your passengers, then do the following:
 - As you approach the Convention Center and parking area on Savannah Harbor Parkway, stay in the left lane and proceed to the turnaround/drop-off area near the front of the facility.
 - After dropping off your passengers there, you will go back on Savannah Harbor Parkway, passing the entrance to the parking lot, and then making a U-Turn so that you can get into the right lane(s) to enter the parking lot or be directed to the overflow lot.
 - Additionally, the Convention Center plans to have golf carts and/or shuttles for those who must park farther away than planned (keep in mind that these may be limited).
